

## Summary of Weekly Petroleum Data for the Week Ending September 18, 2015

U.S. crude oil refinery inputs averaged 16.2 million barrels per day during the week ending September 18, 2015, 310,000 barrels per day less than the previous week's average. Refineries operated at 90.9% of their operable capacity last week. Gasoline production increased last week, averaging over 9.5 million barrels per day. Distillate fuel production increased slightly last week, averaging 5.1 million barrels per day.

U.S. crude oil imports averaged 7.2 million barrels per day last week, down by 13,000 barrels per day from the previous week. Over the last four weeks, crude oil imports averaged over 7.4 million barrels per day, 2.0% below the same four-week period last year. Total motor gasoline imports (including both finished gasoline and gasoline blending components) last week averaged 504,000 barrels per day. Distillate fuel imports averaged 164,000 barrels per day last week.

U.S. commercial crude oil inventories (excluding those in the Strategic Petroleum Reserve) decreased by 1.9 million barrels from the previous week. At 454.0 million barrels, U.S. crude oil inventories remain near levels not seen for this time of year in at least the last 80 years. Total motor gasoline inventories increased by 1.4 million barrels last week, and are in the upper half of the average range. Finished gasoline inventories stayed same while blending components inventories increased last week. Distillate fuel inventories decreased by 2.1 million barrels last week but are in the middle of the average range for this time of year. Propane/propylene inventories fell 0.6 million barrels last week but are well above the upper limit of the average range. Total commercial petroleum inventories decreased by 2.9 million barrels last week.

Total products supplied over the last four-week period averaged 19.7 million barrels per day, up by 1.6% from the same period last year. Over the last four weeks, motor gasoline product supplied averaged about 9.2 million barrels per day, up by 3.0% from the same period last year. Distillate fuel product supplied averaged 3.8 million barrels per day over the last four weeks, up by 1.3% from the same period last year. Jet fuel product supplied is up 5.7% compared to the same four-week period last year.
